Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3-7, 9 and 11 are rejected under 35 U.S.C. 102(a) as being anticipated by Brassell (6763802).

Brassell discloses silicone rubber dampers 44 on a shaft supporting butterfly valves 40 that can be made of nylon.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brassell. It would have been obvious to one of ordinary skill in the art to select the resonant frequency of the shaft necessary to reduce noise.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brassell. It would have been obvious to one of ordinary skill in the art to choose the durometer of the dampers 44 to achieve a predetermined amount of dampening.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brassell as applied to claim 6 above, and further in view of Altmann et al(5669350). Figures 3-6 of Altmann et al show elastomeric seals 22 on butterfly valves. It would have been obvious to one of

ordinary skill in the art to include elastomeric seals on the butterfly valves in Brassell for improved sealing as taught by Altmann et al.
